### **Editorial Review**

#### Review

"This is a perfect book for any med student and resident (or attending for that matter) - really handy during clinical rotations and intern year for understanding the evidence behind our bread-and-butter clinical decisions....I found the summaries easily readable. I particularly liked how they are split up between quick reviews and in-depth sections depending on the level of information you desire. I have been referring to this frequently on my iPad; works great on kindle, especially given my hospital's spotty internet connection."

-Internal Medicine Resident Physician (Amazon.com)

"This is a perfect book for any med student and resident (or attending for that matter) - really handy during clinical rotations and intern year for understanding the evidence behind our bread-and-butter clinical decisions." -RG (Amazon.com) "I would highly recommend this product to health care trainees at any level to get a sense of the literature that supports the decisions made by health care professionals!" -DD (Amazon.com) " Easy way to build a working knowledge of the literature" - LK (Amazon.com)

#### From the Inside Flap

The text is organized into 2 Minute Medicine's signature tiered writing style. This features key points, a quick "Study Rundown", and an "In-Depth" section for examining key details that one may wish to refer to when citing the study. As always, every medical summary cites the original study. In the e-book version this takes the form of a direct web link within the summary to the specific trial on the publishing journal's website in addition to a comprehensive bibliography at the end of the book. In the paperback version, references are cited at the end of each study summary as well as in a comprehensive bibliography at the end of the book.

#### About the Author

If you know how big good thing about a book, you can feel enjoy to read a reserve. In the modern era like at this point, many ways to get book which you wanted.

**Meghan Drucker:**

As a college student exactly feel bored to reading. If their teacher asked them to go to the library in order to make summary for some guide, they are complained. Just little students that has reading's internal or real their leisure activity. They just do what the instructor want, like asked to go to the library. They go to presently there but nothing reading critically. Any students feel that reading through is not important, boring and also can't see colorful pictures on there. Yeah, it is to become complicated. Book is very important for you personally. As we know that on this time, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore , this 2 Minute Medicine's The Classics in Medicine: Summaries of the Landmark Trials, 1e (The Classics Series) can make you sense more interested to read.
