Lead Generation: Methods and Strategies (Methods and Principles in Medicinal Chemistry) From Wiley-VCH

In this comprehensive two-volume resource on the topic senior lead generation medicinal chemists present a coherent view of the current methods and strategies in industrial and academic lead generation. This is the first book to combine both standard and innovative approaches in comparable breadth and depth, including several recent successful lead generation case studies published here for the first time.

Beginning with a general discussion of the underlying principles and strategies, individual lead generation approaches are described in detail, highlighting their strengths and weaknesses, along with all relevant bordering disciplines like e.g. target identification and validation, predictive methods, molecular recognition or lead quality matrices. Novel lead generation approaches for challenging targets like DNA-encoded library screening or chemical biology approaches are treated here side by side with established methods as high throughput and affinity screening, knowledge- or fragment-based lead generation, and collaborative approaches. Within the entire book, a very strong focus is given to highlight the application of the presented methods, so that the reader will be able to learn from real life examples. The final part of the book presents several lead generation case studies taken from different therapeutic fields, including diabetes, cardiovascular and respiratory diseases, neuroscience, infection and tropical diseases.

The result is a prime knowledge resource for medicinal chemists and for every scientist involved in lead generation.

Editorial Review

About the Author

Joerg Holenz is a trained organic and medicinal chemist and acquired his PhD in Germany on the synthesis of alkaloids as antimalarial agents. After leading the preclinical activities of the marketed analgesic Tapentadol (Grünenthal Pharmaceuticals GmbH), he headed the medicinal chemistry department of Barcelona-based Laboratorios Esteve. He then moved to AstraZeneca's CNS/ pain research unit in Sweden to head lead generation chemistry. In 2012, Joerg was selected to join AZ's newly formed 'virtual' neuroscience unit in Boston as director of discovery and preclinical sciences. As a project leader he is responsible for pioneering a novel concept of driving research and development projects via increased use of academic and industry collaborative networks. In his career, Joerg worked predominantly with peripheral and central targets in the pain and neuroscience disease areas. He has edited, authored or contributed to more than 45 publications, 50 patent applications and several books and book chapters.

Users Review

From reader reviews:

Margaret Boyer:

As people who live in often the modest era should be up-date about what going on or data even knowledge to make these keep up with the era which can be always change and make progress. Some of you maybe may update themselves by examining books. It is a good choice in your case but the problems coming to you actually is you don't know what type you should start with. This Lead Generation: Methods and Strategies (Methods and Principles in Medicinal Chemistry) is our recommendation to make you keep up with the world. Why, because book serves what you want and need in this era.

Dorothy Walker:

You can get this Lead Generation: Methods and Strategies (Methods and Principles in Medicinal Chemistry) by browse the bookstore or Mall. Just viewing or reviewing it may to be your solve trouble if you get difficulties for the knowledge. Kinds of this e-book are various. Not only through written or printed but also can you enjoy this book simply by e-book. In the modern era like now, you just looking of your mobile phone and searching what their problem. Right now, choose your current ways to get more information about your publication. It is most important to arrange yourself to make your knowledge are still upgrade. Let's try to choose right ways for you.

Rose Hilton:

Do you like reading a e-book? Confuse to looking for your preferred book? Or your book was rare? Why so many question for the book? But almost any people feel that they enjoy with regard to reading. Some people likes examining, not only science book but in addition novel and Lead Generation: Methods and Strategies (Methods and Principles in Medicinal Chemistry) as well as others sources were given know-how for you.

After you know how the truly amazing a book, you feel wish to read more and more. Science publication was created for teacher or students especially. Those publications are helping them to increase their knowledge. In additional case, beside science publication, any other book likes Lead Generation: Methods and Strategies (Methods and Principles in Medicinal Chemistry) to make your spare time considerably more colorful. Many types of book like this one.

Dianna Chrisman:

As a university student exactly feel bored for you to reading. If their teacher questioned them to go to the library or even make summary for some reserve, they are complained. Just little students that has reading's heart or real their interest. They just do what the instructor want, like asked to go to the library. They go to generally there but nothing reading seriously. Any students feel that studying is not important, boring and also can't see colorful images on there. Yeah, it is to get complicated. Book is very important for yourself. As we know that on this era, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore this Lead Generation: Methods and Strategies (Methods and Principles in Medicinal Chemistry) can make you sense more interested to read.
