**Modern Fourier Analysis (Graduate Texts in Mathematics)** By Loukas Grafakos

This text is aimed at graduate students in mathematics and to interested researchers who wish to acquire an in depth understanding of Euclidean Harmonic analysis. The text covers *modern* topics and techniques in function spaces, atomic decompositions, singular integrals of nonconvolution type and the boundedness and convergence of Fourier series and integrals. The exposition and style are designed to stimulate further study and promote research. Historical information and references are included at the end of each chapter.

This third edition includes a new chapter entitled "Multilinear Harmonic Analysis" which focuses on topics related to multilinear operators and their applications. Sections 1.1 and 1.2 are also new in this edition. Numerous corrections have been made to the text from the previous editions and several improvements have been incorporated, such as the adoption of clear and elegant statements. A few more exercises have been added with relevant hints when necessary.

### Editorial Review

#### Review

“The most up-to-date account of the most important developments in the area. ... It has to be pointed out that the hard ones usually come with a good hint, which makes the book suitable for self-study, especially for more motivated students. That being said, the book provides a good reference point for seasoned researchers as well.” (Atanas G. Stefanov, *Mathematical Reviews*, August, 2015)

#### From the Back Cover

This text is addressed to graduate students in mathematics and to interested researchers who wish to acquire an in depth understanding of Euclidean Harmonic analysis. The text covers *modern* topics and techniques in function spaces, atomic decompositions, singular integrals of nonconvolution type, and the boundedness and convergence of Fourier series and integrals. The exposition and style are designed to stimulate further study and promote research. Historical information and references are included at the end of each chapter.

This third edition includes a new chapter entitled "Multilinear Harmonic Analysis" which focuses on topics related to multilinear operators and their applications. Sections 1.1 and 1.2 are also new in this edition. Numerous corrections have been made to the text from the previous editions and several improvements have been incorporated, such as the adoption of clear and elegant statements. A few more exercises have been added with relevant hints when necessary.

#### Reviews from the Second Edition:

“The books cover a large amount of mathematics. They are certainly a valuable and useful addition to the existing literature and can serve as textbooks or as reference books. Students will especially appreciate the extensive collection of exercises.”

?Andreas Seeger, **Mathematical Reviews**

“The exercises at the end of each section supplement the material of the section nicely and provide a good chance to develop

additional intuition and deeper comprehension. The historical notes in each chapter are intended to provide an account of past research as well as to suggest directions for further investigation. The volume is mainly addressed to graduate students who wish to study harmonic analysis.”

?Leonid Golinskii, **zbMATH**

#### About the Author

Loukas Grafakos is a Professor of Mathematics at the University of Missouri at Columbia.

## **Users Review**

### **From reader reviews:**

#### **Regina Rodgers:**

With other case, little folks like to read book Modern Fourier Analysis (Graduate Texts in Mathematics). You can choose the best book if you'd prefer reading a book. So long as we know about how is important a book Modern Fourier Analysis (Graduate Texts in Mathematics). You can add knowledge and of course you can around the world by way of a book. Absolutely right, due to the fact from book you can understand everything! From your country till foreign or abroad you may be known. About simple issue until wonderful thing you can know that. In this era, you can open a book or searching by internet gadget. It is called e-book. You can utilize it when you feel uninterested to go to the library. Let's study.

#### **Nancy Jackson:**

Book is to be different for every grade. Book for children till adult are different content. As it is known to us that book is very important for people. The book Modern Fourier Analysis (Graduate Texts in Mathematics) had been making you to know about other knowledge and of course you can take more information. It is quite advantages for you. The book Modern Fourier Analysis (Graduate Texts in Mathematics) is not only giving you far more new information but also to be your friend when you really feel bored. You can spend your own personal spend time to read your guide. Try to make relationship using the book Modern Fourier Analysis (Graduate Texts in Mathematics). You never experience lose out for everything in the event you read some books.

#### **Herbert Mikula:**

Typically the book Modern Fourier Analysis (Graduate Texts in Mathematics) will bring someone to the new experience of reading the book. The author style to spell out the idea is very unique. Should you try to find new book to read, this book very ideal to you. The book Modern Fourier Analysis (Graduate Texts in Mathematics) is much recommended to you you just read. You can also get the e-book from official web site, so you can easier to read the book.

#### **Stacie Schneider:**

In this age globalization it is important to someone to receive information. The information will make professionals understand the condition of the world. The fitness of the world makes the information simpler to share. You can find a lot of personal references to get information example: internet, paper, book, and soon. You can view that now, a lot of publisher that will print many kinds of book. Typically the book that recommended for you is Modern Fourier Analysis (Graduate Texts in Mathematics) this reserve consist a lot of the information on the condition of this world now. This book was represented how do the world has grown up. The vocabulary styles that writer require to explain it is easy to understand. Typically the writer made some research when he makes this book. Here is why this book suitable all of you.
