**Performance Enhancements in a Frequency Hopping GSM Network** By Thomas Toftegaard Nielsen, Jeroen Wigard

Due to the explosive global growth in the number of mobile subscribers, as well as the growth predicted in the mobile data segment, the need for improved spectrum efficiency on the radio interface becomes more and more important. Frequency hopping (FH) is an effective method for improving the spectrum efficiency. One of the advantages of FH is that it can be combined with other spectral efficiency improving features like power control, handover and reuse partitioning.

*Performance Enhancements in a Frequency Hopping GSM Network* covers FH and some of the additional features in detail. It begins with an in-depth description of the basic concept of FH on link level as well as on system level. Different methods have been used for analysis, such as link level simulations, network level simulations and classic tele-traffic theory.

Special features of *Performance Enhancements in a Frequency Hopping GSM Network*:

- Combines the practical experiences of operator and vendor with more theoretical research methods. An in-depth treatment of prevailing problems in GSM networks;
- Presentation of a new method, computer-aided network design (CAND), which has been developed to analyse the complex network structures of a GSM network. CAND provides the possibility for more realistic performance evaluations than conventional methods;
- Provides GSM-specific analysis of functionality improvements in power control, discontinuous transmission, and several handover algorithms;
- Explanation of the quality and capacity gains of features like the combination of FH and reuse partitioning, referred to as intelligent frequency hopping;
- A frequency planning method for FH GSM networks is presented. This method exploits the benefits from FH directly in the allocation process, increasing the overall frequency plan.

### **Editorial Review**

#### **Users Review**

##### **From reader reviews:**

##### **Carolyn Baird:**

As people who live in often the modest era should be change about what going on or details even knowledge to make these people keep up with the era which can be always change and advance. Some of you maybe will certainly update themselves by examining books. It is a good choice for you but the problems coming to you actually is you don't know which one you should start with. This Performance Enhancements in a Frequency Hopping GSM Network is our recommendation to cause you to keep up with the world. Why, because book serves what you want and wish in this era.

##### **Enoch Dutton:**

This Performance Enhancements in a Frequency Hopping GSM Network usually are reliable for you who want to be considered a successful person, why. The explanation of this Performance Enhancements in a Frequency Hopping GSM Network can be one of several great books you must have will be giving you more than just simple looking at food but feed an individual with information that perhaps will shock your preceding knowledge. This book will be handy, you can bring it everywhere and whenever your conditions at e-book and printed versions. Beside that this Performance Enhancements in a Frequency Hopping GSM Network giving you an enormous of experience including rich vocabulary, giving you tryout of critical thinking that we all know it useful in your day task. So , let's have it and revel in reading.

##### **Rayford Alexander:**

Don't be worry if you are afraid that this book can filled the space in your house, you might have it in e-book method, more simple and reachable. This specific Performance Enhancements in a Frequency Hopping GSM Network can give you a lot of buddies because by you looking at this one book you have issue that they don't and make you more like an interesting person. This kind of book can be one of a step for you to get success. This publication offer you information that perhaps your friend doesn't learn, by knowing more than other make you to be great persons. So , why hesitate? We should have Performance Enhancements in a Frequency Hopping GSM Network.

##### **David Fern:**

As we know that book is essential thing to add our information for everything. By a publication we can know everything we would like. A book is a set of written, printed, illustrated or blank sheet. Every year had been exactly added. This publication Performance Enhancements in a Frequency Hopping GSM Network was

filled about science. Spend your spare time to add your knowledge about your science competence. Some people has diverse feel when they reading a new book. If you know how big good thing about a book, you can sense enjoy to read a guide. In the modern era like currently, many ways to get book you wanted.
