Advances in Generative Lexicon Theory: 46 (Text, Speech and Language Technology) From Springer

This collection of papers takes linguists to the leading edge of techniques in generative lexicon theory, the linguistic composition methodology that arose from the imperative to provide a compositional semantics for the contextual modifications in meaning that emerge in real linguistic usage. Today's growing shift towards distributed compositional analyses evinces the applicability of GL theory, and the contributions to this volume, presented at three international workshops (GL-2003, GL-2005 and GL-2007) address the relationship between compositionality in language and the mechanisms of selection in grammar that are necessary to maintain this property. The core unresolved issues in compositionality, relating to the interpretation of context and the mechanisms of selection, are treated from varying perspectives within GL theory, including its basic theoretical mechanisms and its analytical viewpoint on linguistic phenomena.

Editorial Review

From the Back Cover

This collection of papers takes linguists to the leading edge of techniques in generative lexicon theory, the linguistic composition methodology that arose from the imperative to provide a compositional semantics for the contextual modifications in meaning that emerge in real linguistic usage. Today's growing shift towards distributed compositional analyses evinces the applicability of GL theory, and the contributions to this volume, presented at three international workshops (GL-2003, GL-2005 and GL-2007) address the relationship between compositionality in language and the mechanisms of selection in grammar that are necessary to maintain this property. The core unresolved issues in compositionality, relating to the interpretation of context and the mechanisms of selection, are treated from varying perspectives within GL theory, including its basic theoretical mechanisms and its analytical viewpoint on linguistic phenomena.

About the Author

James Pustejovsky teaches and does research in Artificial Intelligence and Computational Linguistics in the Computer Science Department at Brandeis University. His main areas of interest include: lexical meaning, computational semantics, temporal and spatial reasoning, and corpus linguistics. He is active in the development of standards for interoperability between language processing applications, and lead the creation of the recently adopted ISO standard for time annotation, ISO-TimeML. He is currently heading the development of a standard for annotating spatial information in language. More information on publications and research activities can be found at his webpage: pusto.com.

Manny Rayner is a researcher at the NASA Ames Research Center, California. Beth Ann Hockey is head of NASA's Clarissa project, which in June of 2005 became the first spoken dialogue system to be used in space. Pierrette Bouillon is head of the MedSLT medical spoken language translation project at Geneva University.

Chungmin Lee is a Professor in the Department of Linguistics at Seoul National University.

Users Review

From reader reviews:

Martha Robertson:

Why don't make it to be your habit? Right now, try to ready your time to do the important work, like looking for your favorite guide and reading a reserve. Beside you can solve your short lived problem; you can add your knowledge by the publication entitled Advances in Generative Lexicon Theory: 46 (Text, Speech and Language Technology). Try to the actual book Advances in Generative Lexicon Theory: 46 (Text, Speech and Language Technology) as your friend. It means that it can to become your friend when you sense alone and beside that course make you smarter than previously. Yeah, it is very fortunated to suit your needs. The book makes you a lot more confidence because you can know every thing by the book. So , let's make new experience along with knowledge with this book.

William Rocha:

Inside other case, little people like to read book *Advances in Generative Lexicon Theory: 46 (Text, Speech and Language Technology)*. You can choose the best book if you want reading a book. So long as we know about how is important some sort of book *Advances in Generative Lexicon Theory: 46 (Text, Speech and Language Technology)*. You can add knowledge and of course you can around the world with a book. Absolutely right, since from book you can realize everything! From your country till foreign or abroad you will end up known. About simple thing until wonderful thing you are able to know that. In this era, we are able to open a book or searching by internet unit. It is called e-book. You may use it when you feel bored to go to the library. Let's go through.

Joey Mendoza:

Book is actually written, printed, or outlined for everything. You can know everything you want by a publication. Book has a different type. As you may know that book is important factor to bring us around the world. Adjacent to that you can your reading ability was fluently. A book *Advances in Generative Lexicon Theory: 46 (Text, Speech and Language Technology)* will make you to end up being smarter. You can feel far more confidence if you can know about every little thing. But some of you think that open or reading any book make you bored. It is not make you fun. Why they may be thought like that? Have you seeking best book or suitable book with you?

Edward Lott:

Spent a free time to be fun activity to do! A lot of people spent their spare time with their family, or all their friends. Usually they performing activity like watching television, going to beach, or picnic from the park. They actually doing same thing every week. Do you feel it? Do you want to something different to fill your own free time/ holiday? Could possibly be reading a book could be option to fill your free of charge time/ holiday. The first thing you ask may be what kinds of book that you should read. If you want to consider look for book, may be the guide untitled *Advances in Generative Lexicon Theory: 46 (Text, Speech and Language Technology)* can be excellent book to read. May be it might be best activity to you.
