Cleaning with Solvents: Science and Technology By John Durkee Ph.D. P.E.

High-precision cleaning is required across a wide range of sectors, including aerospace, defense, medical device manufacturing, pharmaceutical processing, semiconductor/electronics, etc.

Cleaning parts and surfaces with solvents is simple, effective and low-cost. Although health and safety and environmental concerns come into play with the use of solvents, this book explores how safe and compliant solvent-based cleaning techniques can be implemented. A key to this is the selection of the right solvent. The author also examines a range of newer "green" solvent cleaning options.

This book supplies scientific fundamentals and practical guidance supported by real-world examples. Durkee explains the three principal methods of solvent selection: matching of solubility parameters, reduction of potential for smog formation, and matching of physical properties. He also provides guidance on the safe use of aerosols, wipe-cleaning techniques, solvent stabilization, economics, and many other topics.

A compendium of blend rules is included, covering the physical, chemical, and environmental properties of solvents.

- Three methods explained in detail for substitution of suitable solvents for those unsuitable for any reason: toxic solvents don't have to be tolerated; this volume explains how to do better
- Enables users to make informed judgments about their selection of cleaning solvents for specific applications, including solvent replacement decisions
- Explains how to plan and implement solvent cleaning systems that are effective, economical and compliant with regulations

Editorial Review

Users Review

From reader reviews:

April Robles:

Do you have favorite book? If you have, what is your favorite's book? Book is very important thing for us to learn everything in the world. Each reserve has different aim or perhaps goal; it means that guide has different type. Some people experience enjoy to spend their time and energy to read a book. They are reading whatever they get because their hobby is usually reading a book. Why not the person who don't like reading a book? Sometime, individual feel need book once they found difficult problem or maybe exercise. Well, probably you should have this Cleaning with Solvents: Science and Technology.

Timothy Payne:

Book is definitely written, printed, or outlined for everything. You can realize everything you want by a reserve. Book has a different type. As we know that book is important factor to bring us around the world. Next to that you can your reading talent was fluently. A guide Cleaning with Solvents: Science and Technology will make you to be smarter. You can feel a lot more confidence if you can know about almost everything. But some of you think this open or reading any book make you bored. It is not necessarily make you fun. Why they can be thought like that? Have you trying to find best book or acceptable book with you?

Timothy Austin:

People live in this new time of lifestyle always make an effort to and must have the extra time or they will get large amount of stress from both daily life and work. So , if we ask do people have free time, we will say absolutely yes. People is human not only a robot. Then we inquire again, what kind of activity do you possess when the spare time coming to you of course your answer may unlimited right. Then do you try this one, reading textbooks. It can be your alternative with spending your spare time, often the book you have read will be Cleaning with Solvents: Science and Technology.

Carole Houston:

It is possible to spend your free time you just read this book this guide. This Cleaning with Solvents: Science and Technology is simple to create you can read it in the park your car, in the beach, train in addition to soon. If you did not include much space to bring the particular printed book, you can buy often the e-book. It is make you better to read it. You can save the particular book in your smart phone. So there are a lot of benefits that you will get when one buys this book.
