Ear, Nose and Throat Disease (MCQ's...Brainscan) By Kevin P. Gibbin,
Patrick J. Bradley

This book was conceived as a means of learning by inquiring-self testing carried out conscientiously is an effective way of acquiring knowledge. A wrongly answered question should stimulate the examinee to return to his books to discover the correct answer, although it should be noted that in a number of cases we have annotated brief comments. We hope the book will be of benefit to a number of learners in otolaryngology: medical students, house officers and nurses under going post-basic training. We hope also that it may help general practitioner trainees, for whom otolaryngology presents a significant workload. We recognise that this book must be complementary to standard textbooks but our aspirations remain that the student will gain even greater benefit from his efforts by spending some time in self assessment. Nottingham Kevin P. Gibbin 1989 Patrick J. Bradley

Contents

1. Ear.	60
2. Nose.	98
3. Throat.	

1. Ear Questions Q. 1. 1 In a normal ear a. the membrana tensa and membrana flaccida both contain three distinct layers: epithelial, fibrous and mucosal b. the long process of the incus can never be seen through an intact drum c. the tip of the long process of the incus articulates with the head of the stapes via a synarthrosis d. the incudomalleolar joint is a synovial joint e.
