

Designing Experiments and Analyzing Data: A Model Comparison Perspective, Second Edition (Avec CD)

By Scott E. Maxwell, Harold D. Delaney, Ken Kelley

Designing Experiments and Analyzing Data: A Model Comparison Perspective, Second Edition (Avec CD) By Scott E. Maxwell, Harold D. Delaney, Ken Kelley

Through this book's unique model comparison approach, students and researchers are introduced to a set of fundamental principles for analyzing data. After seeing how these principles can be applied in simple designs, students are shown how these same principles also apply in more complicated designs.

Drs. Maxwell and Delaney believe that the model comparison approach better prepares students to understand the logic behind a general strategy of data analysis appropriate for various designs; and builds a stronger foundation, which allows for the introduction of more complex topics omitted from other books.

Several learning tools further strengthen the reader's understanding:

*flowcharts assist in choosing the most appropriate technique;

*an equation cross-referencing system aids in locating the initial, detailed definition and numerous summary equation tables assist readers in understanding differences between different methods for analyzing their data;

*examples based on actual research in a variety of behavioral sciences help students see the applications of the material;

*numerous exercises help develop a deeper understanding of the subject.

Detailed solutions are provided for some of the exercises and *realistic data sets allow the reader to see an analysis of data from each design in its entirety.

Updated throughout, the second edition features:

*significantly increased attention to measures of effects, including confidence intervals, strength of association, and effect size estimation for complex and simple designs;

*an increased use of statistical packages and the graphical presentation of data;

*new chapters (15 & 16) on multilevel models;

*the current controversies regarding statistical reasoning, such as the latest debates on hypothesis testing (ch. 2);

*a new preview of the experimental designs covered in the book (ch. 2);

*a CD with SPSS and SAS data sets for many of the text exercises, as well as tutorials reviewing basic statistics and regression; and

*a Web site containing examples of **SPSS and SAS** syntax for analyzing many of the text exercises.

Appropriate for advanced courses on experimental design or analysis, applied statistics, or analysis of variance taught in departments of psychology, education, statistics, business, and other social sciences, the book is also ideal for practicing researchers in these disciplines. A prerequisite of undergraduate statistics is assumed. An **Instructor's Solutions Manual** is available to those who adopt the book for classroom use.

Designing Experiments and Analyzing Data: A Model Comparison Perspective, Second Edition (Avec CD) By Scott E. Maxwell, Harold D. Delaney, Ken Kelley Bibliography

• Sales Rank: #869177 in Books

• Brand: Routledge

• Published on: 2003-07-01

• Ingredients: Example Ingredients

• Original language: English

• Number of items: 1

• Dimensions: 10.20" h x 2.50" w x 7.10" l, 4.08 pounds

• Binding: Hardcover

• 1104 pages

Editorial Review

Review

"Overall, this is an excellent resource for those designing and analyzing experiments, and for those wishing to consolidate their knowledge of individual designs into a unified conceptual framework."

?American Statistician

Users Review

From reader reviews:

Roderick Olin:

The book Designing Experiments and Analyzing Data: A Model Comparison Perspective, Second Edition (Avec CD) will bring you to the new experience of reading a new book. The author style to elucidate the idea is very unique. In the event you try to find new book to see, this book very ideal to you. The book Designing Experiments and Analyzing Data: A Model Comparison Perspective, Second Edition (Avec CD) is much recommended to you to read. You can also get the e-book from the official web site, so you can easier to read the book.

Larry Davis:

Do you have something that you enjoy such as book? The publication lovers usually prefer to opt for book like comic, brief story and the biggest an example may be novel. Now, why not seeking Designing Experiments and Analyzing Data: A Model Comparison Perspective, Second Edition (Avec CD) that give your satisfaction preference will be satisfied by means of reading this book. Reading habit all over the world can be said as the opportunity for people to know world better then how they react toward the world. It can't be said constantly that reading addiction only for the geeky particular person but for all of you who wants to become success person. So, for every you who want to start studying as your good habit, you may pick Designing Experiments and Analyzing Data: A Model Comparison Perspective, Second Edition (Avec CD) become your current starter.

Brenda Villa:

Many people spending their time period by playing outside with friends, fun activity along with family or just watching TV all day long. You can have new activity to pay your whole day by reading through a book. Ugh, you think reading a book can really hard because you have to use the book everywhere? It okay you can have the e-book, bringing everywhere you want in your Smartphone. Like Designing Experiments and Analyzing Data: A Model Comparison Perspective, Second Edition (Avec CD) which is keeping the e-book version. So, try out this book? Let's notice.

Jason Buckley:

Is it a person who having spare time and then spend it whole day by means of watching television programs or just telling lies on the bed? Do you need something new? This Designing Experiments and Analyzing Data: A Model Comparison Perspective, Second Edition (Avec CD) can be the reply, oh how comes? A fresh book you know. You are so out of date, spending your extra time by reading in this brand new era is common not a nerd activity. So what these textbooks have than the others?
