## **Editorial Review**

From [Booklist](#)

This work covers a broad range of information related to modern warfare as well as civilian agencies such as the CIA, FBI, and the Department of Homeland Security. The target audience is current military personnel and those training to enter the military, though it will also serve as a useful ready-reference source for the general user in need of background information on these topics. An alphabetical list of entries is provided, along with a "Reader's Guide," which divides each entry into such broad categories as "Civil-Military Relations," "Diversity," "Educational Institutions," and "Wars/Military Involvement." The four volumes include a variety of entries, from American Civil War to Cyberwar, and from Armed Forces Radio and Television Service to Don't ask, don't tell, as well as entries on all of the senior military academies. The signed entries average four pages and include suggestions for further readings. A few of the entries include black-and-white illustrations, consisting mostly of photographs, maps, and charts. This is a high-quality work that introduces the reader to a wide variety of issues related to the military and military-related issues. All senior military colleges as well as schools with ROTC programs will want to have a copy of this encyclopedia. Public libraries will also want to consider this work because of the broad range of useful facts.
