Graph Databases By Ian Robinson, Jim Webber, Emil Eifrem

Discover how graph databases can help you manage and query highly connected data. With this practical book, you'll learn how to design and implement a graph database that brings the power of graphs to bear on a broad range of problem domains. Whether you want to speed up your response to user queries or build a database that can adapt as your business evolves, this book shows you how to apply the schema-free graph model to real-world problems.

Learn how different organizations are using graph databases to outperform their competitors. With this book's data modeling, query, and code examples, you'll quickly be able to implement your own solution.

- Model data with the Cypher query language and property graph model
- Learn best practices and common pitfalls when modeling with graphs
- Plan and implement a graph database solution in test-driven fashion
- Explore real-world examples to learn how and why organizations use a graph database
- Understand common patterns and components of graph database architecture
- Use analytical techniques and algorithms to mine graph database information

Editorial Review

About the Author

Ian Robinson is the co-author of *REST in Practice* (O'Reilly Media, 2010). Ian is an engineer at Neo Technology, working on a distributed version of the Neo4j database. Prior to joining the engineering team, Ian served as Neo's Director of Customer Success, managing the training, professional services, and support arms of Neo, and working with customers to design and develop mission-critical graph database solutions. Ian came to Neo Technology from ThoughtWorks, where he was SOA Practice Lead and a member of the CTO's global Technical Advisory Board. Ian presents frequently at conferences worldwide on topics including the application of graph database technologies, and RESTful enterprise integration.

Dr. Jim Webber is Chief Scientist with Neo Technology, where he researches novel graph databases and writes open source software. Previously, Jim spent time working with big graphs like the Web for building distributed systems, which led him to being a co-author on the book *REST in Practice* (O'Reilly Media, 2010). Jim is active in the development community, presenting regularly around the world. His blog is located at <http://jimwebber.org> and he tweets often @jimwebber.

Emil Eifrem is CEO of Neo Technology and co-founder of the Neo4j project. Before founding Neo, he was the CTO of Windh AB, where he headed the development of highly complex information architectures for Enterprise Content Management Systems. Committed to sustainable open source, he guides Neo along a balanced path between free availability and commercial reliability. Emil is a frequent conference speaker and author on NOSQL databases.

Users Review

From reader reviews:

Marianne Haglund:

Playing with family within a park, coming to see the ocean world or hanging out with close friends is thing that usually you might have done when you have spare time, in that case why you don't try issue that really opposite from that. Just one activity that make you not feeling tired but still relaxing, trilling like on roller coaster you already been ride on and with addition associated with. Even you love Graph Databases, you can enjoy both. It is very good combination right, you still need to miss it? What kind of hang-out type is it? Oh can happen its mind hangout fellas. What? Still don't get it, oh come on its referred to as reading friends.

Jimmy Dolce:

Your reading 6th sense will not betray a person, why because this Graph Databases e-book written by well-known writer who knows well how to make book which might be understand by anyone who else read the book. Written with good manner for you, dripping every ideas and publishing skill only for eliminate your personal hunger then you still hesitation Graph Databases as good book not just by the cover but also

through the content. This is one guide that can break don't ascertain book by its handle, so do you still needing an additional sixth sense to pick this particular!? Oh come on your examining sixth sense already alerted you so why you have to listening to an additional sixth sense.

Leroy Barker:

Beside this Graph Databases in your phone, it might give you a way to get closer to the new knowledge or data. The information and the knowledge you can got here is fresh in the oven so don't end up being worry if you feel like an outdated people live in narrow small town. It is good thing to have Graph Databases because this book offers to you personally readable information. Do you oftentimes have book but you would not get what it's interesting features of. Oh come on, that would not happen if you have this within your hand. The Enjoyable arrangement here cannot be questionable, just like treasuring beautiful island. Use you still want to miss the item? Find this book along with read it from right now!

Dean Herbert:

On this era which is the greater man or woman or who has ability in doing something more are more special than other. Do you want to become certainly one of it? It is just simple approach to have that. What you must do is just spending your time very little but quite enough to possess a look at some books. One of the books in the top record in your reading list is usually Graph Databases. This book which can be qualified as The Hungry Hills can get you closer in becoming precious person. By looking upwards and review this e-book you can get many advantages.
