Multihomed Communication with SCTP (Stream Control Transmission Protocol) From Brand: CRC Press

Although multihomed communication is a rapidly emerging trend for next generation networks, no known book explores multihomed communication with the Stream Control Transmission Protocol (SCTP). Filling this void, **Multihomed Communication with SCTP (Stream Control Transmission Protocol)** explains this innovative feature that allows an endpoint to simultaneously maintain and use multiple points of connectivity to the network?making it possible for fixed and mobile users to connect to the Internet via multiple service providers or last hop technologies. Among the topics addressed, the book covers:

- Support of node mobility between networks
- Concurrent multipath transfer using SCTP multihoming
- Low delay communication and multimedia applications
- High performance computing using commodity hardware and software
- SCTP support in the INET framework and its analysis in the Wireshark packet analyzer
- SCTP application interface

Ideal for researchers and programmers, this forward-looking reference describes SCTP multihoming concepts and implementation, applications of multihoming across different domains, and proposed extensions such as multipath transfer and mobility. Although the book is aimed at those with an advanced background, it also covers the fundamental concepts and mechanisms of SCTP multihoming to help anyone get up to speed on SCTP.

Editorial Review

Users Review

From reader reviews:

Paul Delatorre:

Book is to be different per grade. Book for children until adult are different content. We all know that that book is very important for people. The book Multihomed Communication with SCTP (Stream Control Transmission Protocol) had been making you to know about other expertise and of course you can take more information. It is quite advantages for you. The publication Multihomed Communication with SCTP (Stream Control Transmission Protocol) is not only giving you more new information but also to be your friend when you experience bored. You can spend your own spend time to read your guide. Try to make relationship together with the book Multihomed Communication with SCTP (Stream Control Transmission Protocol). You never really feel lose out for everything in case you read some books.

Aimee Nguyen:

Do you have something that you want such as book? The publication lovers usually prefer to select book like comic, small story and the biggest some may be novel. Now, why not striving Multihomed Communication with SCTP (Stream Control Transmission Protocol) that give your entertainment preference will be satisfied by means of reading this book. Reading behavior all over the world can be said as the opportunity for people to know world a great deal better then how they react toward the world. It can't be said constantly that reading addiction only for the geeky man or woman but for all of you who wants to end up being success person. So , for every you who want to start studying as your good habit, it is possible to pick Multihomed Communication with SCTP (Stream Control Transmission Protocol) become your starter.

Tiffany Lyons:

The book untitled Multihomed Communication with SCTP (Stream Control Transmission Protocol) contain a lot of information on the idea. The writer explains your ex idea with easy method. The language is very clear to see all the people, so do definitely not worry, you can easy to read the item. The book was compiled by famous author. The author brings you in the new era of literary works. You can read this book because you can keep reading your smart phone, or model, so you can read the book throughout anywhere and anytime. In a situation you wish to purchase the e-book, you can open up their official web-site and order it. Have a nice go through.

Monika Cunniff:

Is it an individual who having spare time then spend it whole day by means of watching television programs

or just telling lies on the bed? Do you need something totally new? This Multihomed Communication with Sctp (Stream Control Transmission Protocol) can be the response, oh how comes? The new book you know. You are consequently out of date, spending your spare time by reading in this completely new era is common not a geek activity. So what these publications have than the others?
